

# Case Study – An Audio Visual Work in a Shop Window

## Overview

Audio Visual Installation in a vacant store window

## Product

1 x F1.3 audio drive

## Sound Artist

<https://twitter.com/belfastcityarts>

Belfast City Arts presents “An Audio-visual Work in a Shop Window” composed by B. Comac.

From 8th August until 6th September 2013, Thursday – Saturday, 3pm – 6pm each day, you can hear Whispering Window in action in Belfast.

The work consists of a video of the singer Sarmen Almond performing a score written by the composer. A recording was made and the finished work rear projected onto holographic screen material attached to the shop window. The sound is projected through the glass by a Feonic speaker attached to the window.
